

PARTICIPATE IN RESEARCH: MECHANISMS OF PAIN ANTICIPATION

We are looking for volunteers to take part in studies exploring brain activity associated with pain

WHO WE ARE LOOKING FOR:

- Healthy fluent English-speaking men or women aged 18-60 years
- who are not pregnant
- with no history of chronic pain or current acute pain, no conditions affecting attention such as autism spectrum disorder or ADHD, and no neurological disorders.
- You will be asked questions about your medical history to check your suitability for an MRI scan.

WHAT DO THE STUDIES INVOLVE?

- Studies involve attending a single session of up to 3 hours at the Wellcome Centre for Integrative Neuroimaging or the Old Road Campus Research Building, Oxford.
- You will play a series of virtual reality and attention tasks whilst receiving moderately painful stimuli to your hand or arm.
- During the tasks and while you rest, we will measure your brain activity using electroencephalography (EEG) or functional magnetic resonance imaging (fMRI).
- You will be compensated for your time.
